PCOUNTER IS A COMPLETE PRINT AND COPY SOLUTION FOR BUSINESS.

IN TODAY'S BUSINESS ENVIRONMENT, print and copy costs quickly get out of control. Let Pcounter help you save money now! Pcounter's low cost and easy installation makes cost savings happen immediately. With over 20 years of experience, Pcounter can fit any print and copy need.

ACTIVE DIRECTORY & LDAP INTEGRATION

Pcounter runs on any Windows server platform. It can fully integrate with Active Directory or LDAP for user information in real time without any need to import users.

MONITORING/CLIENT BILLING

All printing is monitored and accounted for, with each printer having its own pricing model. Both color and black and white prints and copies are tracked. All print and copy activity is tracked and reporting options provide analysis by user, device, color/mono, groups, client code or matter number.

CUSTOM REPORTING

A wide variety of reports are built into Pcounter, from common pre-defined reports to custom user-defined. The report generator also allows for easy exporting of data to custom billing software.
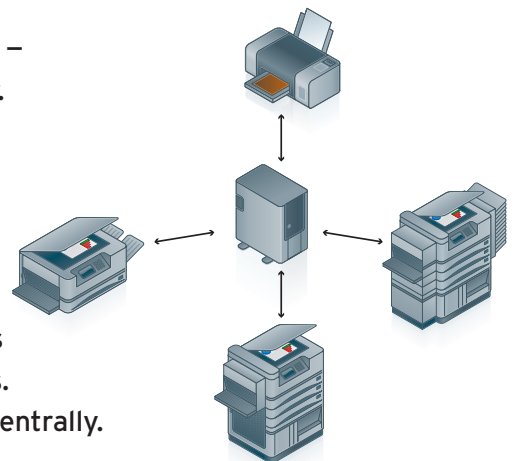

MULTIFUNCTION DEVICE INTEGRATION

Pcounter for OSA allows for tracking of walk-up copies and scans on any OSA device, Pull printing, secure print release are also supported without any additional hardware. The Pcounter for OSA integration allows for graphical release of print jobs right on the native display of the MFD. Pcounter for OSA also supports USB card readers attached to the Sharp device.

CENTRAL SERVER DEPLOYMENT WITH CLUSTER SUPPORT

Pcounter typically runs on each print server – all features can be deployed from the server. All Windows Cluster configurations are fully supported. Local IP or USB/Parallel printers can also be tracked along with network printers using the Pcounter WSManager to push tracking software to workstations. This ensures that all print jobs are properly billed to clients or departments. All print activity is logged and reported on centrally.

MOBILE PRINTING –
PRINT SIMPLY ANYWHERE WITH EVERYONEPRINT

Users with their own laptops, smartphones, tablets, or any other web enabled device can now print without having to install a print driver, with or without authentication. Pcounter EveryonePrint can also allow easy self-configuration of printing to domain printers.

SECURE/PULL PRINTING

Print jobs can be held in network print queues, enabling users to release and/or "pull" jobs to any chosen device. A list of available print jobs can be viewed via an embedded MFP app.

COST CONTROL & JOB ROUTING

Printing can be stopped, delayed or re-directed based on the size, type, characteristics or cost of the print job. Quota limits can be set to ensure users have a maximum print allowance within any specified time period.

PCOUNTER IN VERTICAL MARKETS

LEGAL

Pcounter can easily be customized to meet specific legal sector needs. Client codes and matter numbers are supported, along with data integration between Pcounter and custom billing software such as Elite, Omega, PerfectPractice, PerfectLaw, TABS, PCLaw, and ESILaw.

ENGINEERING/ARCHITECTURE

Engineering and architectural jobs often change causing new blueprints and floor plans to be reprinted. Pcounter tracks plot area and/or plot roll length on large format plotters. Statement reports are built into Pcounter making it simple to bill clients for these jobs.

GOVERNMENT

Government agencies are always looking for ways to save cost, while offering access to multiple devices for their users. Pcounter's automatic job routing easily routes large jobs to higher capacity devices, or even to the print room for large quantity printing. Departmental billing reports are easily generated and customizable as well, making it easy to know where the dollars are going.

REAL ESTATE

With today's affordable color printing technology, real estate agencies which at one time needed to produce brochures at professional printing companies are now able to create them in-house. Pcounter gives agencies the ability to identify which agents are printing, and to bill them later for costs. EveryonePrint allows for full use of mobile devices like tablets for printing.

PCOUNTER. GUARANTEED COST SAVINGS.

SAVE COSTS

- Eliminate accidental printing
- Accountability for all users
- Enforce budgetary limits
- Redirection/rules based printing
- Easily bill clients for print, copy and scan
- Reduced support costs
